## SUMMARY

---

Frontend Software Engineer with 4 years of experience delivering scalable web applications. Expertise in JavaScript, TypeScript, and React, consistently shipping high-quality features on schedule. Developed innovative applications that enhance user experience while collaborating effectively with cross-functional teams. Continuously adopting modern best practices to drive product success.

## SKILLS

---

- **Languages:** JavaScript, TypeScript, SQL, HTML, CSS
- **Technologies:** Vite, React, Redux Toolkit, JWT, NodeJS, Next.js, Angular, Vue, GraphQL

## WORK EXPERIENCE

---

### IBA Group — Unified system for multi-channel customer interaction

Jun 2024 - Present

*Frontend Software Engineer (React)*

- Defined the architecture of web application for employees, establishing the scalable structure using React, Redux Toolkit, and Next.js, integrating chat and workflow modules to support business operations.
- Engineered interactive quiz and photo-task builders that enhanced work transparency and boosted operational efficiency.
- Developed a corporate chat system using SignalR, streamlining issue resolution and reducing response times.

### IBA Group — GIS platform for visualization and analysis of big data

Sep 2023 - Jun 2024

*Frontend Software Engineer (React)*

- Crafted user-friendly frontend screens for creating and managing custom map layers using React and Prime React, closely aligning with stakeholder requirements.
- Built a WKT serializer and deserializer to enable precise handling of geographic data and enhance the platform's data processing capabilities.

### IBA Group — Expert cloud system

Sep 2022 - Sep 2023

*Frontend Software Engineer (Vue)*

- Engineered asynchronous processing and pagination for large text files, ensuring a seamless user experience when handling extensive datasets.
- Designed and implemented intuitive, responsive front-end interfaces using Vue 2, Vuex, Sass, and Bootstrap, which resulted in improved user engagement.

### IBA Group — Management system for insurances and benefits for employers

Sep 2021 - Sep 2022

*Frontend Software Engineer (Angular)*

- Migrated the application from AngularJS to Angular 12, boosting performance by over 12% and enhancing maintainability and scalability.
- Refactored components, views, and services using NgRx to streamline maintenance and reduce update times by more than 20%.

### IBA Group — Online freight exchange platform

Jul 2021 - Sep 2021

*Frontend Software Engineer (React)*

- Developed backend logic for publishing industry and cargo transportation news using NodeJS, PostgreSQL, and AWS S3, thereby increasing user engagement.
- Engineered an intuitive front-end application with Webpack, React, Redux, and Antd that improved user adoption rates.
- Containerized the React application with Docker and Nginx, reducing deployment time by over 20% and enhancing scalability.

## EDUCATION

---

### BSUIR, Minsk

*bachelor's degree*

Sep 2018 - Jun 2022
